

# Childhood Asthma Control Test for children 4 to 11 years.

This test will provide a score that may help the doctor determine if your child's asthma treatment plan is working or if it might be time for a change.

## How to take the Childhood Asthma Control Test

**Step 1** Let your child respond to **the first four questions (1 to 4)**. If your child needs help reading or understanding the question, you may help, but let your child select the response. Complete the remaining **three questions (5 to 7)** on your own and without letting your child's response influence your answers. There are no right or wrong answers.

**Step 2** Write the number of each answer in the score box provided.

**Step 3** Add up each score box for the total.

**Step 4** Take the test to the doctor to talk about your child's total score.

**19 or less** If your child's score is 19 or less, it may be a sign that your child's asthma is not controlled as well as it could be. Bring this test to the doctor to talk about the results.

## Have your child complete these questions.

1. How is your asthma today?

 <b>0</b> Very bad	 <b>1</b> Bad	 <b>2</b> Good	 <b>3</b> Very good
---	--	---	--

SCORE
